

NEW PRODUCT! Countersink 1 Flute

PN	Description
C2500S082-1F	Countersink 1/4" X 82 Degree X 1 FL
C2500S090-1F	Countersink 1/4" X 90 Degree X 1 FL
C2500S100-1F	Countersink 1/4" X 100 Degree X 1 FL

To date, the countersinks have produced smooth, clean edges in rigid products as well as Teflon based materials and plastics. They have also been used to create larger-than-diameter countersinks by using circle interpolation. The single-flute design minimizes chatter, an issue common to some multi-flute designs.

A cost containment benefit of using these tools is they can be re-sharpened and the cutting edges restored to like-new condition. Contact us for more information today.
